

This professional strength anti-static spray protects valuable data, eliminates memory loss, and other other annoying computing errors caused by static electrical charge. It provides long lasting residual protection for reduced downtime and fewer glitches, and helps to reduce attraction of dust to CRT screens. Designed for use in offices, static-sensitive computer areas, word processing and other electronic environments. This non-staining formula is made to be used on fabrics and hard surfaces found on and around computers.

DIRECTIONS:

Carpet and fabrics: Mist lightly but thoroughly over exposed surfaces. Do not soak. Allow to dry before using. Test material for water spotting before use. Treat casters and frames on rolling furniture.

ANTI-STAT

REMOVES STATIC ELECTRICITY FROM
CARPETS, FLOORS, UPHOLSTERY,
WORK SURFACES, CRT SCREENS
AND COMPUTER EQUIPMENT

LONG LASTING & NON-TOXIC

CAUTION:

May irritate eyes. See side panel for additional precautions and first aid instructions.

KEEP OUT OF REACH CHILDREN

Sold By:

Hard Floors: Dilute 1:5 with water and damp mop entire floor including access areas and lanes.

Hard Surfaces: Dampen a clean, lint-free cloth, wiping lightly over computer cabinets, CRT screens, rollers, chutes, guides and trays of printers, bursters, decollaters, sorters and other equipment. Do not spray into vents, mechanical or electrical equipment.

CAUTION:

May irritate eyes. In case of contact, flush eyes and under eyelids with plenty of cool water for at least 15 minutes. If irritation persists, obtain medical attention.
