

This gym floor seal is a modern polyurethane resin designed as a final seal and finish and to provide a tough, glossy, stain and chemical resistant finish on soft or hardwood floors. This finish coat product is designed for wood floors that have been sealed with GYM FLOOR SEAL.

**DIRECTIONS:** Prepare and seal the floor surface with GYM FLOOR SEAL carefully following label directions. Buff sealed floor lightly with #120 grit screen and remove all dust by vacuum and tack rag treated with mineral spirits. Apply this finish over the sealed floor using a clean lamb's wool applicator, using care to apply a smooth, even coat and allow to dry completely. If additional finish coats are desired, buff lightly with #120 grit screen and wipe with a treated tack rag between coats. Allow the finish to dry completely before any traffic is allowed onto the floor.
