

This concrete cleaner and etcher is specially formulated for use on concrete floors, brick, masonry block and flagstone. It contains powerful muriatic acid to clean, etch and whiten concrete and neutralize surface alkalinity. It should be used to prepare all concrete surfaces before painting or sealing, to provide maximum penetration, bonding strength and durability of the coating.

DIRECTIONS:

Sweep floor to remove loose soil. For heavily soiled floors, scrub with a strong detergent to remove heavy soil, grease and oil deposits and rinse. Etch the surface by using a solution of 1 gallon of this product in 5 gallons of water. Swab solution onto the surface, and scrub with an old broom or brush. Allow to work for 10 minutes or until bubbling and fizzing stops. Rinse the surface thoroughly with clean water and allow to dry completely before sealing or painting.

Rinse empty containers before disposal. Use plastic containers to mix solutions – do not store in metal pails, drums or sprayers.

CONCRETE ETCH & CLEANER CONCENTRATE

CLEANS, ETCHES AND BLEACHES
CONCRETE IN ONE EASY STEP

PROVIDES IDEAL SURFACE PREPARATION
BEFORE SEALING OR PAINTING

DANGER  **POISON**

MAY BE FATAL IF SWALLOWED. CAUSES SEVERE BURNS. VAPOR HARMFUL. See side panel for further cautions and first aid instructions.
