

**DIRECTIONS FOR USE:**

CLEAR CUT STRIPPER has been carefully formulated to be used as an integral part of scrub and rinse floor stripping program.

Dust mop entire floor to remove loose dust and dirt. Prepare a stripping solution by diluting 8 to 16 ounces of CLEAR CUT STRIPPER per gallon of warm water. Recommended dilution rates are based upon floors with an accumulation of 10 coats of applied floor finish. To ensure proper solution strength, apply diluted product to a small area of floor. If stripping solution does not cut through all accumulated finish, add more CLEAR CUT STRIPPER. Flood floor with stripping solution with a wet mop. Allow the stripping solution to remain on the floor for 5 to 10 minutes. Do not allow stripping solution to dry on floor. Scrub with a 175 - 300 rpm rotary floor machine equipped with a black stripping pad. If an autoscrubber is to be used, two passes are recommended to complete the scrubbing process. Pick up the stripping/finish residue with a wet vac or autoscrubber. To rinse, flood floor with clean cool water. Pick up with wet vac or autoscrubber. Complete rinsing process by damp mopping with clean, cool water and a clean mop.

**PROFESSIONAL SECRETS TO EFFECTIVE FLOOR CARE:**

- Stripping solution should always be prepared just prior to use.
- Always dry mop before starting any stripping operation - Unremoved dirt and dust can damage floors during scrubbing operations.
- When scrubbing with a rotary scrubber, be certain to overlap passes to cover the entire floor. Walk only where you've scrubbed - It's less slippery.
- To prevent clogging, flip pads frequently. To keep pads in peak operating condition, clean with a dilute solution of stripper and store in a plastic bag.

**WARNING:**

HARMFUL IF SWALLOWED. Avoid contact with eyes or mucous membranes. Prolonged or repeated exposure to skin may cause irritation. Use with adequate ventilation. If swallowed, give person large quantities of water and obtain medical assistance. Do NOT induce vomiting. If in eyes, flush with large quantities of cool water for at least 15 minutes. Obtain medical assistance. If on skin, wash with soap and water.
