

## DIRECTIONS FOR USE:

Spray CLEAR ATTRACTIONS Dust Mop Treatment directly onto an untreated, clean floor mop, being certain to use enough product to thoroughly moisten all fibers - approximately 2 fluid ounces per foot of dust mop. Do NOT saturate the mop. Allow treated mops to dry for at least 6 hours before using.

After dust mop has been used, shake mop vigorously out of doors or onto a sheet of newspaper to release accumulations of dust and dirt. If fine dust comes out of the mop, the mop should be laundered and retreated. When mop becomes too soiled, launder, allow to dry and retreat. Routine washing removes all traces of CLEAR ATTRACTIONS Dust Mop Treatment, eliminating the possibility of an accumulation of an oily residue.

## PROFESSIONAL SECRETS TO EFFECTIVE FLOOR CARE:

- Floors should be dust mopped every night - accumulated dust and dirt cause unsightly scratches or abrasions that will significantly reduce finish durability and lead to frequent stripping and recoating.
- Never use a dust mop to pick-up spilled liquid - dust mops do not have the ability to pick-up and hold liquids. Always use a damp mop or an absorbent cloth to clean up liquid spills.
- Regular use of walk-off mats at all entrances will catch damaging grit - significantly extending the life of your floor finishes.

### CAUTION:

Do not take internally. Avoid contact with eyes and mucous membranes. Wash thoroughly after handling. If swallowed, contact physician or poison control center immediately. Give person several glasses of cool water and induce vomiting. If in eyes, flush with large amounts of cool water for at least 15 minutes. If irritation persists, obtain medical assistance. If on skin, wash with soap and water.
