

This alkaline "pH-up" adjustment is the convenient liquid approach to raising the pH of pool water or neutralizing acidity. It works faster and more effectively than lime or soda ash without clouding pool or spa water.

DIRECTIONS:

The amount of this product required to raise the pH depends on the water's natural buffering capacity. Add 1 to 2 quarts directly to the pool at a point of strong agitation. Do not add to the skimmer or vacuum. Allow 15 to 20 minutes for thorough mixing, then re-test the pH. Repeat addition if required.

ALKALINE "pH - UP" ADJUSTMENT

CONCENTRATED LIQUID RAISES
pH WITHOUT CLOUDING WATER

DANGER  **POISON**

HARMFUL OR FATAL IF SWALLOWED.
CAUSES SEVERE BURNS.

See side panel for further cautions
and first aid instructions.
