

This non-phosphate water conditioner is designed to keep pools attractive and operating properly. It reduces scale formation and corrosion to protect heaters and plumbing,prolonging the life of equipment and increasing efficiency. It sequesters iron and mineral deposits to prevent ugly stains and scum deposits at the water line and on all deck surfaces.

DIRECTIONS: Use an initial treatment of 32 ounces per 1500 gallons of water. If water is extremely hard, increase the dosage up to 48 ounces per 1500 gallons of water. Use this initial dose at the beginning of the season and whenever the pool is filled.

AWT-957

SWIMMING POOL WATER CONDITIONER

**REDUCES SCALE, CORROSION
AND MINERAL DEPOSITS
STOPS CLOUDINESS
AND IRON STAINING**

**IMPROVES FILTER AND
HEATER PERFORMANCE**
